EXPERIENCE

Software Developer (MERN)

Tecaudex

04/2024 - Present Lahore

Software Development company specializing in scalable web applications

- Focused on front-end development using Next.js, React, Material UI (MUI), Tailwind CSS, and ShadCN/UI to build scalable and responsive web applications
- Developed pixel-perfect, production-ready interfaces for high-end, real-estate-related web platforms
- Integrated Mixpanel for event tracking and analytics to monitor user behavior and improve product decisions
- Contributed to the design and implementation of a custom CRM system, including UI development and functionality management
- Collaborated with cross-functional teams to ensure smooth integration of front-end components with backend APIs
- Maintained and optimized existing codebases, ensuring performance, responsiveness, and maintainability across major projects
- Actively participated in code reviews, debugging, and feature planning to enhance application quality and team productivity

Full-stack Developer

AxcelerateAI

04/2023 - 03/2024 Lahore

Tech company focused on AI-driven solutions

- Developing full-stack web applications using the MERN stack (MongoDB, Express.js, React/Next.js, Node.js)
- Creating responsive user interfaces and reusable components with React, Next.js, HTML, CSS, and JavaScript
- Building server-side applications and RESTful APIs using Node.js and Express.js
- Managing and integrating MongoDB databases efficiently
- Skilled in debugging, performance optimization, and writing clean, maintainable code

Web-development Intern

Bytezgrid

06/2022 - 08/2022 Lahore

Internship with a focus on backend development

- Contributed to backend development using Node.js and Express.js, focusing on building RESTful APIs
- Assisted in the design and implementation of MySQL databases, ensuring optimized data structures
- Wrote clean, maintainable code and participated in debugging and testing to support stable application performance

SUMMARY

Full-Stack Developer with **3+** years of experience building **Next.js** and **MERN** products, specializing in **data-heavy SaaS applications**, dashboards, automation, and AI-assisted workflows. Focused on delivering **premium UX**, strong performance, and features that drive real business impact.

Seeking opportunities to **own meaningful product areas**, collaborate closely with **founders, product, and design teams**, and help scale SaaS products from *functional* to **world-class**.
